BETTER TOGETHER

PERRIN Next Step: Better Together from Knowledge to Practice

Ketelaar M¹, Bult M¹, Willems-op het Veld M², Faas E¹, Voorman J^{1,3}, and PERRIN study group

¹ Center of Excellence for Rehabilitation Medicine; De Hoogstraat and UMC Utrecht; ² CP Netherlands; ³ Wilhelmina Children's Hospital, UMC Utrecht, the Netherlands

PERRIN

The research program PERRIN has gained much knowledge on (determinants of) development of children, adolescents and young adults with cerebral palsy (CP), with a focus on activities and participation.

- > 150 publications
- > 130 presentations and workshops
- 10 PhD-theses

The gap

This knowledge on developmental trajectories is hardly used in clinical practice, and persons with CP and parents are not familiar with this knowledge.

Not new: scientific knowledge does not automatically transfer to clinical practice.

The aim

In PERRIN Next Step we aim to develop materials and tools to make scientific knowledge from PERRIN accessible and applicable for end-users; persons with CP, parents and health care professionals.

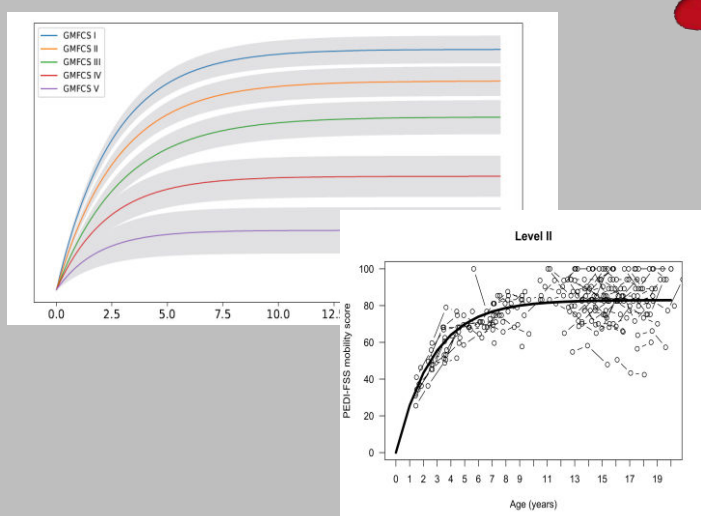

Partnership in Knowledge Translation

Step by step iterative process

Persons with CP
Parents
Researchers
Health care professionals

Example of findings^{1,2}

Examples of topics discussed in meetings

- Variation
- What does it mean for individual prognosis and development?
- Lifelong perspective in combining findings of various domains
- Relation with quality of life?

Building website

Knowledge on developmental domains

Developmental trajectories for subgroups

Tools to prepare and support conversation

Stories and videos of experts by experience

And next

By partnering with relevant stakeholders in this knowledge translation project materials and practical tools are being co-developed to support accessibility, applicability and use of relevant knowledge on development of activities and participation in children, adolescents and young adults with CP. Conversation tools will encourage the dialogue on prognosis, individual goal-setting, and shared decision-making.
